Problem 4

1. `render_scene`

Interface name: `Drawable`

A type is compatible with `Drawable` if it has a `draw(display: Display)` method

2. `aggregate_length`

Interface name: `Sized`

A type is compatible with `Sized` if it supports `len()`

3. `find_largest_component`

1. `x` — interface name: `ComponentSource`. A type is compatible if it has an `all_components()` method that takes no parameters and returns a `ComponentSequence`.
2. `y` — interface name: `ComponentSequence`. A type is compatible if it has a `next_component()` method that takes no parameters and returns the next `Component`
3. `z` — interface name: `Component`. A type is compatible if it has a `size()` method that takes no parameters and returns an `int`.
